Our journey from being a simple recharge cards manufacturer to a global smart solutions provider is proof of our unwavering development in terms of technology and innovation.

FutureCard was founded in 2002 as the pillar company of ENPI Group (Emirates National Plastic Industry) with the mission of producing recharge cards to telecom operators. In no time, the company became a certified payment cards manufacturer for both MasterCard and VISA.

Over the years FutureCard has continued significant expansion of its territories and product portfolio ranging from payment cards, transport cards, IDs, commercial cards, telecom cards and all kinds of smart cards. In 2018, FutureCard opened the door to a new full-fledged manufacturing and supply chain facility with an additional monthly capacity of 10 million smart cards.

End of 2019 we became part of Toppan (Nikkei 225 - TYO: 7911), the Japanese global leader in printing & security.

FutureCard has been acquired by Toppan Gravity, the investment platform of Toppan Leefung - a wholly-owned subsidiary of Toppan. The acquisition makes FutureCard together with Toppan one of the forerunners in the payment, transport and ID markets while enhancing the group’s business growth and performance.
FACILITIES & CAPABILITIES

We are serving a demanding market in constant surge with distinctive cards, secure documents, pioneering end-to-end smart solutions, and expert services.

Toppan FutureCard offers a complete range of state-of-the-art, premium quality payment cards, from normal EMV, to EMV Biometric through to EMV White Label cards, featuring the latest technology.

We are dedicated to offering highly secure, cutting-edge identification documents including ID, driving license, vehicle registration, voter ID, employee and student ID as well as health card.

Toppan FutureCard offers a wide range of advanced transport and access cards fulfilling the different needs of the end-users, while ensuring that the technologies, materials, and features used adhere to the environmental and socio-economic requirements.

We support mobile and fixed telecom network operators by delivering a variety of products from SIM/USIM, payphone cards as well as with a large selection of scratch recharge vouchers in standard and customized formats and technologies.

Toppan FutureCard offers retail brands, malls and shopping centers customized and attractive retail and loyalty cards employing different technologies, starting from simple barcode or magnetic stripe cards to contact or contactless smart cards.
At Toppan FutureCard, we make sure that confidential documents stay confidential and secure through cutting-edge covert, overt and forensic security features.

Forged and fraudulent documents can lead to devastating consequences; therefore, we continuously apply the highest security level along with great attention to detail while designing, printing, and manufacturing these sensitive documents.

We provide a variety of secure documents for the payment and banking as well as the government industry. All these documents are fully customizable according to customers’ requirements.

Toppan FutureCard provides reliable documents with regard to payment and banking.

Thanks to the latest technology and the most advanced security features that Toppan FutureCard is using, we are able to safeguard the provision of reliable and secure payment and banking documents, such as tamper-proof cheques and passbooks.

The governmental documents Toppan FutureCard offers incorporate state-of-the-art design features and forgery-proof security features.

To prevent counterfeiting and falsification of government and public sector documents, powerful and fraud-resistant features need to be added to each document. At Toppan FutureCard, we issue and personalize a wide range of secure documents, such as passports, legal documents, certificates, and diplomas having strong and forgery-proof security features and state-of-the-art design features.
To make these sensitive documents forgery-proof, we incorporate state-of-the-art, fraud resistant security features into our legal documents, certificates and diplomas.

Legal Documents, Certificates & Diplomas

We offer latest generation Supplementary Access Control (SAC) ePassports having highly reliable and advanced level 1, 2 and 3 security features. All our passports are Logical Data Structure (LDS) ready and customizable according to our customers’ needs and design preferences.

ePassports

In order to keep passbooks secure, we equip these documents with reliable magnetic strips. This is to prevent any falsification or misuse which could end up in a big loss for the savings account holder.

Passbooks

Due to the high security requirements, Toppan FutureCard equips its cheques with level 1 and level 2 security features to be counterfeit-proof. Major Banks, as well as public and private sectors organizations on a global scale entrust us with providing them secure and reliable cheques.

Cheques
**END-TO-END SOLUTIONS**

Toppan FutureCard is offering pioneering end-to-end solutions with regard to payment and banking as well as government and ID.

Our aim is to provide our customers fully customizable, secure and easy to use solutions they can rely on.

We understand that different needs require different solutions. Our extensive know-how and experience in the payment and banking as well as the government field, enables us to consistently offer our customers innovative and future-oriented, reliable systems that are tailored precisely to our customers’ needs.

As an end-to-end card solutions provider, we manage everything from the manufacturing and issuance of the cards to their management and enrollment.

On top of cards and secure documents manufacturing for the payment and banking field, Toppan FutureCard offers sophisticated payment and banking solutions. Our advanced Card Management Solutions include Central and Instant Issuance. We understand that each of our customers has different requirements, hence, we are committed to customize each and every solution according the customers’ demand.

Our governmental solutions are aimed at safeguarding residents identification and enhancing the engagement between governments and its citizens.

Next to customized card management solutions, Toppan FutureCard provides secure and tamper-proof governmental solutions. We provide state-of-the-art eID and ePassport, identity management and digital government solutions as well as complete election materials.
Toppan FutureCard’s Central Issuance System is an end-to-end high volume card issuance solution for EMV cards. It covers sophisticated data preparation systems integrated with Hardware Security Modules (HSM) for secure key management. In addition to this, it can generate Personal Identification Numbers (PIN) and mailers.

Our Instant Issuance Solution, enables banks to provide customers with fully personalized payment cards on the spot, which are personalized in real-time at the branch level.

Toppan FutureCard offers fully or semi-finished eID and ePassport solutions. Thanks to our expertise we are mastering the full supply chain from consultancy, design, document and chip security through to the production of secure documents.

Toppan FutureCard offers complete and secure election materials from Voters ID cards to ballot boxes and printing forms, through to complete voting kits, while following set specifications approved by the electoral management body.
Toppan FutureCard is a one-stop-shop fulfilling all its customers’ product-related needs.

Over the years, Toppan FutureCard has worked with major corporations and organizations to fulfill all of their product-related needs.

Our aim is to exceed customer’s expectations and to provide them a carefree experience; therefore we complete our offering with complementary services to make sure that Toppan FutureCard is the central address to-go-to when it comes to payment and banking, ID, telecom as well as transportation and access.

Businesses and service providers trust us with the delicate mission of outsourcing their cards’ and documents’ operations from concept to delivery.

We have accommodated most of our clientele with comprehensive and flexible solutions far beyond secure printing such as secured stock management, warehousing, and end-user delivery services.

To ensure that all our products are being delivered securely and on time, we cover the complete logistics cycle for all our customers’ products.
Toppan FutureCard supports customers with their project from the definition & development stage, up to card or secure documents personalization and other associated logistics.

We employ creative minds who commit themselves to design the most impressive cards, documents and fulfillment packaging to keep a long-lasting positive first impression.

As a certified PCI/DSS Personalization bureau, Toppan FutureCard personalizes all types of cards and secure documents, including secure PIN mailers for payment and commercial sectors, from a single product to large batches, using secure data management and handling systems.

Our Managed Services aim to facilitate the issuance process by installing minimum equipment at bank and authority site, while keeping the data preparation within Toppan FutureCard’s secure production environment.

We execute a large variety of customized creative designs of fulfillment packaging that complement our production and add up on brand image and security attributes.

We work with each customer individually to develop convenient Service Level Agreements (SLA’s) that define specific procedures to guarantee the safe and timely supply of products.
